

Graficon is Grafotronic's exclusive representative

... in Germany, Austria and Switzerland. This provides us with a portfolio of innovative machines from which we can choose the right one to suit your requirements. Grafotronic and Wasberger machines are used for label, digital and packaging printing. The machine portfolio ranges from rewinding machines, die-cutters and processing machines to 100% control units for the pharmaceutical industry. The modular structure makes it possible to expand the system at any time.

grafotronic
the future of finishing machines

SR-Series • Inspection machine

- Accurate inspection and slitting at 250 m/min.
- For labels, cardboard and mono-film
- Semi-turret – up to 80% less down time

HI-Series • Inspection machine

- Units and functions can be expanded at any time due to the modular structure
- Integrated 100% inspection system
- Quick, stable, reliable
- Automatic knife adjustment

R-Series • RE-Inspection machine SERVO

- 100% Re-Inspection features with high speed linear buffer
- Waste unwind unit
- Inkjet Module for backside numbering (Inspected)

DCL-Series • Digital Finishing

- 100% "Non-Stop" production
- Fully digital production line, entirely modular
- Semi-rotary die-cutting unit up to 60 m/min.
- Fully-rotary die-cutting unit up to 180 m/min. for inseting, 220 m/min. for blank labels
- Units and functions can be expanded at any time due to the modular structure

CF-Compact • Digital Finishing

- Entry-level machine possible to expand
- Semi-rotary die-cutting unit up to 60 m/min.
- Fully-rotary die-cutting unit up to 180 m/min. in register, 220 m/min. for blank labels

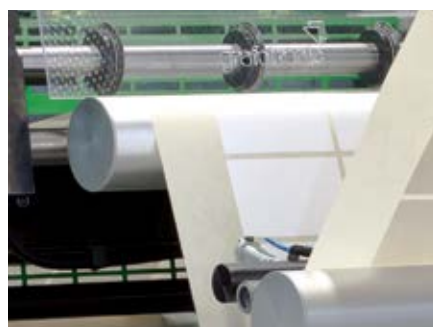

DC-Series • Converting

- Die-cutting almost all labels at 220 m/min.
- Die-cutting in register at 180 m/min.
- Semi-automatic "Non-Stop" turret

CLD-Series • Modular Converting

- Units and functions can be expanded at any time due to the modular structure

WASBERGER provides a broad portfolio of accessories for label printers and labelling productions

TT250 • Horizontal Table Top Rewinder

- Speed: 150m/min.
- Bi-directional
- Counter: labels and metres
- Roll size: ø 450 mm
- Easy to use screen control

VTT250 / VTT330 • Vertical Table Top Rewinder

- Speed: 150m/min.
- Bi-directional
- Counter: labels and metres
- Roll size: ø 450 mm
- Easy to use screen control

TTF250 • Table Top Folder

- Fold counter
- Folding gears from 60 – 120 T
- Quick change fold size
- Easy to use screen control

RL150 / RL200 • Roll Lifter

- Easy to use and handle
- Prevents operator injuries
- Maximum lifting capacity: 150 kg
- Maximum width: 440 mm

FA2000 / SA2000 • Core Cutter

- Diameter change over time: less than 2 minutes
- Auto eject of last remaining core
- Only good cores in the box – minimum waste
- Easy to use color touch screen
- Robust design
- Low maintenance
- Excellent price/performance ratio
- Possible to upgrade to fully automatic version (SA2000)
